

CAPSULE SUMMARY SHEET

Survey No.: PG:72-26/PG:73-26

Construction Date: circa 1910-Present

Name: Glenarden

Location: 1st - 11th Sts., Glenarden Pkwy., Johnson Ave., Leslie Ave., Fulton Ave., Irvin Ave., McClain Ave., Wesley St., Reed St., Fiske Ave., Piedmont Ave., Grant Dr., Tyler St., Polk St., Church St., Dellwood Ave., Echols Ave., Cawker Ave., Hayes St.

Private and Public Ownership / Occupied / Condition: Good / Unrestricted Access
Present Use: educational, government, private residences, recreational

Description:

Glenarden is a historically African-American town located between John Hanson Highway and Landover Road in Prince George's County. The town is bisected by the Capital Beltway. Glenarden originally consisted of three subdivisions: Glenarden Heights (1911), Glenarden (1913) and Ardwick Park (1921). The three subdivisions today are characterized by modern, suburban single- and multi-family houses. Glenarden also includes municipal, recreational and educational facilities.

Significance:

Glenarden developed as a result of the Washington, Baltimore and Annapolis Electric Railroad, which led through rural Prince George's County during the early 20th-century. The community was founded in 1910 and marketed to African-Americans from the beginning. Glenarden developed slowly through the first half of the twentieth century. An urban renewal movement during the 1970s resulted in the demolition of most of the early buildings, but the city has since been completely redeveloped.

Resource Count: approximately 1000

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Glenarden is an historically African-American city and a Planned Suburban Neighborhood located between John Hanson Highway and Landover Road in Prince George's County. The Capital Beltway bisects the city. Glenarden today is characterized by modern, suburban, single- and multi-family houses. The city also includes municipal, recreational and educational facilities. Glenarden is located within two Prince George's County planning areas and therefore has two survey numbers. Glenarden originally consisted of three subdivisions: Glenarden Heights (1911), Glenarden (1913) and Ardwick Park (1921). These three subdivisions are discussed individually below.

Glenarden Heights: The Glenarden Heights subdivision was first platted in 1911 (See Photos 1-20 of 34). It includes the properties on First through Eleventh Streets, which cross Glenarden Parkway at right angles and end in cul-de-sacs. Glenarden Heights is characterized by medium to large single family houses, mostly constructed from the 1970s through the present. These houses are situated on large, landscaped lots. Two types of smaller houses, 1920s-40s cottages and 1950s-60s front-gable houses, date from earlier eras. All of the properties on Sixth Street as well as on the east side of Fifth Street were removed for construction of the Capital Beltway.

Building Types:

1920s-1940s Cottages: Approximately 20 small houses dating from the 1920s through the 1940s remain, especially along Glenarden Parkway. They are generally 1-story tall and constructed of wood-frame with side-gable roofs and porches. Example: 8905 Glenarden Pkwy., Owner: Keikhosrow Dastani (See Photo 9 of 34).

The original town hall, also constructed during the 1940s, remains at the northwest corner of Glenarden Parkway and Seventh Street. This heavily-altered building is 2-stories tall and 3-bays wide with a shallow, front-gable roof. The town hall has a stucco first story, an aluminum sided second story, and an asphalt-shingle roof. All doors and windows are replacements. A large chimney once located in the center of the building has been removed. Owner: Glenarden (See Photo 12 of 34).

1950s-1960s Front-Gable houses: Small houses dating from the 1950s and 1960s are located along Fifth and Seventh Streets. These 1-story, 2-bay houses are generally constructed of wood-frame with front-gable roofs. Example: 1504 Seventh St., Owners: Harold and Tjuana Bigelow (See Photo 14 of 34).

Glenarden: The Glenarden subdivision was first platted in 1913 (Photos 21-26 of 34). It includes the properties along Johnson Avenue, Leslie Avenue, Glenarden Parkway, Fulton Avenue, Irvin Avenue, McClain Avenue, Wesley Street, and Reed Street. Glenarden was originally planned to have a radial street system leading from the streetcar stop on its western boundary. However, the semi-circular streets surrounding the stop have been removed, and the new town hall was constructed in their place in 1965. Glenarden has a combination of public buildings, multi-family housing, and single family housing. Public buildings include the current municipal building at the corner of Glenarden Parkway and Martin Luther King, Jr. Highway, the police station at the corner of Leslie Avenue and MLK Highway, a recreational center on McClain Avenue, and a library at the corner of Brightseat Avenue and Glenarden Parkway. All of these buildings were constructed during the 1960s and 1970s. Multi-family housing constructed during the 1970s is most common along Fulton, Irvin and McCain Avenues (See Photo 21 of 34). These buildings were designed to resemble single family houses, and include duplexes and quadplexes. The single family houses were mostly constructed from the 1950s through the 1970s, although some earlier buildings remain.

Building Type:

1920s-1940s Cottages: Approximately 25 bungalows and small houses remain in Glenarden from the 1920s through the 1940s. These are generally 1- or 1 ½-stories tall, 3-bays wide and constructed of wood frame. Most of these houses are simple with minimal ornamentation, however some resemble the Bungalow style. Example: 8622 Johnson Ave., Owners: Henry and Bessie Leonard (See Photo 26 of 34).

CONTINUATION SHEET

RESOURCE NAME: Glenarden

SURVEY NO.: PG:72-26/PG:73-26

ADDRESS: 1st - 11th Sts., Glenarden Pkwy., Johnson Ave., Leslie Ave., Fulton Ave., Irvin Ave., McClain Ave., Wesley St., Reed St., Fiske Ave., Piedmont Ave., Grant Dr., Tyler St., Polk St., Church St., Dellwood Ave., Echols Ave., Cawker Ave., Hayes St. ; Glenarden; Prince George's County

7. Description (Continued)

Ardwick Park/Glenarden Woods: Ardwick Park was platted in 1921 and originally included streets called Piedmont Drive, Grant Avenue, Polk Avenue, Church Street, Hayes Avenue and Tyler Avenue. Only three houses (one bungalow and two Colonial Revivals) remain from the early period (See Photos 27-28 of 34). They are located along Piedmont Avenue. The St. Joseph's Catholic Church, originally located between Grant and Piedmont, was demolished during the 1960s. Ardwick Park did not develop quickly, and during the 1950s, the subdivision was enlarged and re-platted as Glenarden Woods (See Photos 29-34 of 34). The street pattern was altered from its original grid pattern to its current curvilinear pattern. Glenarden Woods developed quickly during the 1950s and 1960s with typical suburban housing types. The most common type is the Minimal Traditional. Split-Level and Colonial Revival houses were also constructed.

Building Type:

Minimal Traditional: These 1-story, 4-bay houses have side-gable roofs that often extend over the entry. Many are constructed of concrete-masonry units. Example: 7803 Glenarden Pkwy., Owner: Eugene and Edith Bruton (See Photo 30 of 34).

Glenarden Woods also includes public buildings such as the Glenarden Woods Elementary School, constructed in 1957, and the Martin Luther King Recreational Center, constructed circa 1980. Apartment housing is located along Hayes Street between Glenarden Parkway and Johnson Avenue.

From the 1960s through the 1980s, the Glenarden municipality annexed additional parcels of land, including Washington Commerce Center to the southwest, Dodge Park and Glenarden Apartments to the south, Royale Gons to the southeast, and Tyrol Estates to the northeast. However, these areas were not part of the historic fabric of the community.

Prepare both a summary paragraph of significance and a general statement of history and support

Glenarden developed as a result of the Washington, Baltimore and Annapolis Electric Railroad, which led through rural Prince George's County during the early 20th-century. The community was founded in 1910 and marketed to African-Americans from the beginning. Glenarden developed slowly through the first half of the twentieth century. An urban renewal movement during the 1970s resulted in the demolition of most of the early buildings, but the city has since been completely redeveloped.

The construction of the Washington, Baltimore and Annapolis Electric Railroad from Washington, D.C. through rural Prince George's County in 1908 prompted a wave of growth during the early-20th century. In particular, two African American communities, Lincoln and Fairmount Heights, had been successfully established along the streetcar line by 1910. In 1910, William R. Smith, a Washington, D.C. developer operating as the Glenarden Development Company, purchased approximately 154 acres of land on both sides of the railroad. He platted the 78-acre Glenarden Heights in 1911 and the 76-acre Glenarden in 1913. Ardwick Park was platted in 1921. The Glenarden streetcar station was established at the intersection of the streetcar line and the main street of the community (Glenarden Parkway). The station was surrounded by gardens and a semi-circular road. The community was marketed to African-Americans, many of whom worked for the Pennsylvania Railroad or streetcar lines (KCI 1999, Appen. D).

The first development in Glenarden was scattered, and growth was slow. The community lacked amenities such as electricity and police service. By 1920, Glenarden contained 25 houses and one church (St. Joseph's). A 2-room school was constructed in Ardwick Park in 1922. It was demolished and replaced by the Glenarden Woods Elementary School in 1957. Glenarden contained 51 houses by 1940: 20 in Glenarden Heights, 25 in Glenarden and six in Ardwick Park. Around that time, service by the WB&A Railroad was discontinued due to lack of ridership, and the right-of-way was converted to the George Palmer Highway (now MLK Highway) (Ibid.; M-NCPPC 1995, 7).

In the 1920s and 1930s, two other African-American communities in Prince George's County incorporated: North Brentwood (south of Hyattsville) and Fairmount Heights (east of Washington, D.C.). In pursuit of better public services, Glenarden incorporated in 1939. The first mayor, W. H. Swann, quickly arranged for electricity, natural gas, street paving, police service, and a fire department (now disbanded). In 1945, the Washington Suburban Sanitary Commission installed water and sewer lines. The Washington, Marlboro and Annapolis bus company began bus service between Glenarden and Seat Pleasant in the same year. A post office was constructed in 1950 (Ibid.)

The population of Glenarden has increased rapidly from the late 1950s through the present. Glenarden Woods, Glenarden Apartments and Tyrol Estates were annexed during the 1950s and 1960s. However, by the 1960s, much of the original housing stock of Glenarden was deteriorating. In 1963, in cooperation with the U.S. Public Housing Administration, the Glenarden Housing Authority constructed a 90-unit public housing project. The Glenarden Building

8. Significance (Continued)

Corporation constructed 100 middle-income houses along Glenarden Parkway in 1977. In addition to these ventures, a major urban renewal program was initiated in 1974 when Glenarden received a HUD Community Development Block Grant. Urban renewal projects included expansion of the 1965 town hall, construction of a library, and development of recreational areas as well as demolition and reconstruction of housing. Numbers indicating the extent of urban renewal vary, but the total number of relocated households may have been as high as 600 over the 1960s and 1970s. In one part of Glenarden, 107 of 194 buildings were to be demolished. The old housing stock was replaced with public housing and single family housing. At least 100 single-family houses were built by the Ryland company (Ibid.; Vertical Files).

Glenarden continued to annex properties through the 1980s. Retail facilities were constructed at the Washington Commerce Center in 1981, and the property was annexed in 1983. A townhouse development known as Carrollton Station was also annexed in 1983. The 245-acre Royale Gons tract was annexed in 1985 for future development (M-NCPPC 1995; 11-12).

SURVEY NO.: PG:72-26/PG:73-26

ADDRESS: 1st - 11th Sts., Glenarden Pkwy., Johnson Ave., Leslie Ave., Fulton Ave., Irvin Ave., McClain Ave., Wesley St., Reed St., Fiske Ave., Piedmont Ave., Grant Dr., Tyler St., Polk St., Church St., Dellwood Ave., Echols Ave., Cawker Ave., Hayes St. ; Glenarden; Prince George's County

8. Significance (Continued)

National Register Evaluation:

Character defining elements for Planned Suburban Neighborhoods, as defined in the I-495/I-95 Capital Beltway Corridor Transportation Improvement Study, include 1) grid or curvilinear street pattern; 2) cohesive groupings of buildings by function, date or style; 3) consistent lot size and building set-back; 4) landscape features such as sidewalks, street lighting and tree plantings; 5) community amenities such as social halls, schools, parks or community centers; and 6) association with a major transportation corridor. To be considered eligible for the National Register of Historic Places, Planned Suburban Neighborhoods must possess excellent integrity of all character-defining elements. Glenarden has public and residential buildings constructed from the 1920s through the present according to subdivision plats from 1911, 1913 and the 1950s. The properties have consistent scale, lot set-backs and landscaping. In addition, Glenarden includes amenities such as municipal buildings and parks. Glenarden was originally associated with the Washington, Baltimore and Annapolis Electric Railroad.

Glenarden is an early-twentieth century, middle-class suburban community developed specifically for African Americans. It remains a successful African-American suburb to this day. The resources within the community represents a continuum of development from the early African-American suburbs of the 1910s and 1920s through the urban renewal of the 1960s and 1970s to the continuing suburbanization of middle-class African Americans today. Though the community is a important entity within the suburbanization context of the Washington D.C. region, the community does not contain a sufficient number of historic structures to convey its association with suburbanization during the first half of the twentieth century. Due to urban renewal efforts of the 1960s and 1970s, an overwhelming majority of structures within Glenarden are less than fifty years old. It cannot be demonstrated that the community has achieved exceptional importance within the last 50 years, therefore, it does not meet National Register Criteria Consideration G. However, It is recommended that the community be reconsidered for the National Register of Historic Places in ten years, after a bulk of the structures reach an "historic" age.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Very few historic buildings survive in the City of Glenarden today. The first subdivision was platted in 1913, and by 1920 there were 25 households in the new community. By the late 1960s, the modest building stock of these early years was in deteriorating condition, and the principal developments of the subsequent years revolved around a major urban renewal project. Much of the substandard housing was removed during the 1970s and replaced by units of public housing and housing for the elderly, as well as by modern single-family homes. During the 1980s and '90s, new residential and commercial development continued. The two most noticeable buildings in the City are the Municipal Center, which fronts on Martin Luther King, Jr., Boulevard, and the Glenarden Branch of the County Library system, at the intersection of Brightseat Road and Glenarden Parkway.

Prepare both a summary paragraph of significance and a general statement of history and support.

The community of Glenarden developed along the line of the Washington, Baltimore and Annapolis (WB&A) Electric Railway which opened in 1908. This high-speed inter-urban line spurred the development of a number of new communities, such as Lincoln, a garden suburb promoted by Thomas J. Calloway, which was easily accessible by the WB&A line and which attracted black professionals from Washington and Baltimore. Lincoln was platted in 1908, and two years later, William R. Smith, a Washington businessman, began buying up property which fronted on the WB&A line three miles southwest of Lincoln. By 1913, Smith's property had been subdivided as Glenarden and Glenarden Heights; the subdivision featured a circle with a garden center and radiating lots at the location of the WB&A station. In 1921 an area on the opposite side of the tracks was subdivided as Ardwick Park, and then later resubdivided as Glenarden Woods.

The first residents of the new Glenarden community built modest houses: small cottages and bungalows, as well as narrow two-story front-gabled dwellings suited to the narrow lots. By 1920 there were 25 households in Glenarden, and the largest group of working men was employed by the railroad (both the Pennsylvania Railroad and the WB&A). A Rosenwald schoolhouse was built in 1922, and St. Joseph's Roman Catholic Church opened in the same year, both located in the section known as Ardwick Park. The population of Glenarden continued to grow.

During the 1930s the Glenarden Civic Association worked toward improved community services, and in 1939 Glenarden became the third (after North Brentwood and Fairmount Heights) African-American municipality to be incorporated. By this time the WB&A Railroad had closed down, forced out by increased use of the automobile; its right-of-way was converted into the George Palmer Highway, now Martin Luther King, Jr., Highway. During the 1940s a two-story Municipal Hall was constructed and a local post office was established. The 1922 schoolhouse was replaced with the modern Glenarden Woods Elementary School which opened in 1957. Much of the early housing, however, was in deteriorating condition, and during the 1970s Glenarden qualified for and received Housing and Urban Development Department funding for urban renewal and rehabilitation. Substandard housing was removed and replaced by new building stock. The town hall was replaced by a large municipal building, and a local branch of the County Library system was constructed, both designed by resident architect Anthony Johns.

Although very little of early Glenarden remains to be seen, the community has a long history and has been described as "the heart and hub of the black community of Prince George's County."
